

Martel Vasquez

Fairfax, VA 22030 | 703-649-1479 | MartelVasquez31@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY:

Recent Computer Science graduate with experience building APIs, web/mobile apps, and backend systems. Skilled in debugging, testing, and applying secure coding practices. Quick learner and strong team collaborator with hands-on Agile experience.

EDUCATION:

Bachelor of Science in Computer Science

George Mason University, College of Engineering & Computing

GPA: 3.70

Fairfax, VA

Cum Laude

Relevant Coursework: Data Structures, Software Engineering, Artificial Intelligence, Object-Oriented Programming, Formal Methods & Models, Computer Systems & Programming, Operating Systems, Analysis of Algorithms, Secure Programming and Systems, Database Concepts, Comparative Programming Languages

TECHNICAL PROJECTS:

- **Django Note API (Python, Django, TastyPie):** Developed RESTful API backend with full CRUD functionality, integrated routing, and endpoint testing via Postman. Demonstrated version control using Git and GitHub throughout development lifecycle.
- **Set-UID Buffer Overflow Lab (C):** Exploited a vulnerable Set-UID C program to escalate privileges and spawn a root shell. Bypassed ASLR, NX, and StackGuard protections, demonstrating a strong understanding of system-level vulnerabilities and security testing.
- **Flextimer App (Dart/Flutter):** Created a workout timer app allowing users to save routines, target muscle groups, and receive recommendations. Contributed to requirements, advanced features, and UI design (light/dark mode, app info), using Agile workflow and unit testing.
- **Musical Chairs Simulation (Java):** Simulated a multithreaded game of musical chairs using Java concurrency tools. Applied synchronization and thread coordination to mimic real-world race conditions and resolve thread safety issues.
- **Cache Simulator (Java):** Developed a simulator implementing FIFO, LFU, and LRU cache replacement policies using linked lists and hash maps. Tested cache hit/miss logic to optimize data retrieval by 20%.
- **Reinforcement Learning Agents (Python, AI/ML):** Designed and trained value iteration and Q-learning agents in an Agile environment. Applied CI-like testing and modular design for production-readiness.
- **Customer Order Management CLI (Java, Oracle SQL):** Built secure command-line interface connected to SQL backend via JDBC. Automated data ingestion and query execution, showcasing back-end and integration expertise.

SKILLS:

- Languages: Java, Python, C, SQL, HTML, CSS, JavaScript, Dart
- Frameworks/Tools: Django, Postman, Git, JUnit, Flutter
- Practices: Agile development, Secure programming, DevSecOps-aware development
- Platforms: Windows, macOS, Linux
- Certifications: CompTIA Network+ (Expected Oct 2025), CompTIA Security+ (Expected Nov 2025)

PROFESSIONAL EXPERIENCE:

Footwear Associate

Dicks Sporting Goods

August 2021 - Present

Fairfax, VA

- Delivered hands-on customer support and issue resolution in a fast-paced retail environment.
- Boosted sales by 20% through product knowledge and tailored recommendations.
- Recognized for professionalism, teamwork, and consistent customer satisfaction improvements.
